

SUMMER 2020 PRE-COLLEGE PROGRAMS

for High School Students

Are you working with motivated students who want to learn new skills, improve their abilities, and explore topics that add to their college résumé? Would they like to spend a week on our beautiful campus as they participate in rigorous workshops with other high-achieving students — while also enjoying fun social activities on and off campus? Then one of Susquehanna's summer programs may be a great choice for them! Our faculty and college student mentors will challenge them in their coursework and support them throughout the week.

Please share these academic opportunities with interested students and families.
